**Living or working in a well-designed building can change the way we think and feel; it inspires us, uplifts us, brings us together in new ways and improves functionality.**

Plywood has evolved as a material worthy of any modern exterior or interior design. It transfers the warmth of wood with the natural grain structure destined for visual exploitation. Shadowclad<sup>®</sup> is an ideal solution for high end residential, commercial and institutional applications, right the way through to the classic holiday home. To add flair and retain the natural warmth and beauty of a wooden interior or exterior, look no further than Shadowclad.

# SHADOWCLAD<sup>®</sup> ADDS A LAYER OF WARMTH TO INTERIOR SPACES

Great architecture doesn't have to come at the cost of the environment. It can work in a sustainable relationship with the environment and have minimal impact.

# FLASHINGS RANGE

**Manufactured from extruded aluminium, the Shadowclad<sup>®</sup> Flashings range is designed to complement Shadowclad panels used in exterior applications.**

### FOR THE DESIGNER;

'Shadowclad Ultra offers a continuous powder coated sheet surface that provides a moisture barrier for a dry and consistent surface to apply topcoats. The 12 mm thick panels are available in either a Texture or Groove profile to give aesthetic options. The range available and flashing designs provide flexibility to achieve different looks. CHH Woodproducts provides great technical & online resources of CAD and Specification and Installation detailing advice. Specify with confidence designing with Shadowclad plywood.'

### FOR THE BUILDER;

'Shadowclad Ultra helps save time on site as primers are not required, the panels have already been prepped. Shadowclad plywood panels are lightweight and easy to install using traditional building materials, no off-site or 3rd party contracted labour required. The product is backed by great customer service and technical support. The installation details provided are clear and concise and can be downloaded from the CHH website.'

### FOR THE HOME OWNER;

'The finished look of Shadowclad, inside and out, creates a great finished result. The panels feature a ship lap joint for seamless joining and provides the natural warmth and beauty of real wood. By using plywood manufactured from Carter Holt Harvey Woodproducts, you know the product is compliant and comes from sustainably grown plantation pine trees.'

**Shadowclad<sup>®</sup> Flashings are available in either a natural anodised finish (silver colour) for immediate installation, or mill finished allowing you to powdercoat in any desired colour finish.**
